

MODELS

We offer four different Panfan models. Mains or battery powered with either automatic-sensor or manual-switch activation options.

The Panfan fits on top of an accessible overflow pipe inside the tank. If required, seek advice on alternative water and flush valves to suit.

The replaceable filter is accessible from the end of the unit and typically needs changing every 12 months.

Mains Power

230 Volt, ac ~ 6 Volt, dc power adaptor (ultra low dc safe)

Auto sensor

Touch free wireless automatic sensor (Panfan will automatically run while toilet is occupied)

Manual switch

Manual on / Auto off

Battery

6 Volt, dc rechargeable battery (includes charger)

Auto sensor

Touch free automatic sensor (Panfan will automatically run while toilet is occupied) (Includes a filter change / battery recharge indicator)

Manual switch

Manual on / Auto off
